

DTAS Awareness Course

Managers and Supervisors

The transport of raw milk and milk fractions is the essential link between the farmer and the milk processor. The DTAS Standards applied throughout this part of the dairy supply chain are vital to ensuring food safety, product integrity, maintaining quality and standing up to both internal and external scrutiny.

The objective of this course is to provide milk transport managers, supervisors and anybody else involved in milk transport, with an understanding of how the DTAS Standards apply to their business. This optional course has been officially recognised by the DTAS Management Committee.

Course Overview

- One day course
- Covers all DTAS Standards
Based at a milk haulage depot
Includes practical elements
- Focus on what is required to comply with the Standards
- Opportunities to discuss practicalities and share good practice

Who is it for?

- Hauliers and milk purchasers
- Other businesses who would benefit from a good understanding of DTAS
- Managers
- Supervisors
- New personnel
- Other personnel who would benefit from a good understanding of DTAS
