UK

## Dairy Transport Assurance Scheme

Codes of Practice on Milk Tanker Design

April 2018

(Version 3)

## Tanker Specification Review

---

- The BS Standard BS3441:1995 has been withdrawn but no replacement standard put in its place.
- Please note that just because a standard has been withdrawn without a replacement, then you are still able to use that standard, as British Standards are a guide to inform best practice, unless informed by legislation, in which case the current standard for the use of will be cited in the current legislation

## Tanker Specification Review

---

- The vehicle construction of Use is no longer in place and all vehicles must be built to Whole vehicle Type Approval.

# Tanker Specification Review

## Dairy Code of Practice on Milk Tanker design

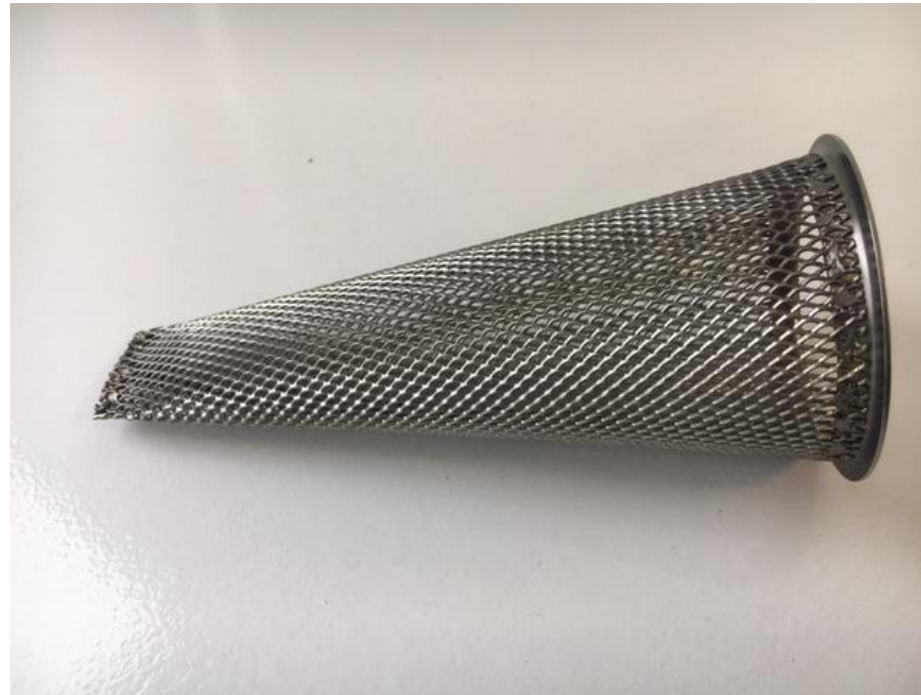

# Tanker Specification Review

# Tanker Specification Review

---
